Our Town July 26, 2018

Previously published April 24, 2014

*The Soupster sees people who
bite off and chew*

Sitting with Chavez outside Harrigan Centennial Hall Building, the Soupster could feel his friend's distress radiate out like static electricity. Chavez shook a Funny Times newspaper at the Soupster with vigor. "How dare they 'dis' Our wonderful Town!" he said. "Look at this!"

Chavez pointed to a particular cartoon in the newspaper. Funny Times is a monthly collection of cartoons and humorous essays from all over the country. Chavez's finger tapped a four-panel job that "dissed" the federal government for making embarrassing announcements only in places so remote, so forgotten, that no one would ever hear. Places like Minden City, Michigan; Bellows Falls, Vermont; Skaneateles, New York; and Sitka, Alaska.

Sitka, Alaska?? A place so forgotten, so remote that the federal government could make a major announcement and no one would ever hear? Our Town? Chavez didn't think so!

Nor did the Soupster. "That's troubling," the Soupster said. "Because Our Town is about as famous as you can get for its size."

"James Michener announced that he was going to write his novel 'Alaska' right here," said Chavez.

"And, how about October 18, 1867?" added the Soupster. "The whole Castle Hill thing. People have sure heard about that. This is definitely not a place so forgotten and so remote that no one ever hears anything."

Chavez tried to agree, but he was drowned out as the main doors on the Centennial Hall Building swung open and about a dozen people poured out. Some held Rib-eyes, some held Sirloin Tips, some held T-bones and one held a Porterhouse.

"Who are they?" asked the Soupster.

"Steakholders," Chavez said proudly. "These people are discussing the thorniest issues that face Our Town and coming up with creative, collaborative solutions."

"The meat?"

"Symbolic," Chavez said. "They're not afraid to get into the meat of issues, right down to the gristle and bone."

"A little extreme," opined the Soupster as the Steakholders disbursed, "nonetheless admirable."

"We need these guys," said Chavez, "You see..."

But Chavez was drowned out as the Hall Building's doors again parted and a second crew of people exited. This time each of them held a short and pointy wooden stick, the kind you would use to secure a tent to the ground.

"And them?" asked the Soupster, as that crowd moved on.

"A group of different stakeholders," said Chavez.

Get to Know Us
AT MOUNTAINSIDE FAMILY HEALTHCARE

Cheri Hample, MPH MSW

Change is in the air at Mountainside Family Healthcare as Cheri Hample, MPH MSW, the new Clinic Manager, is welcomed to the Sitka Community Hospital team!

Cheri brings extensive experience in health care, training in the Toyota Production System of organizational management (process improvement) and commitment to excellent customer service.

"I grew up in Minnesota and am a graduate of the University of Minnesota with master's degrees in Public Health and Social Work," Cheri shares about herself. "I first moved to Alaska in 1980 and discovered Sitka in 1999 when I came through on a ferry headed south. I consider Sitka my heart home and moved back in late January 2017."

When not working, Cheri is happiest when enjoying the beauty of the water, rainforest and mountains that surround us. She takes full advantage of all the wonderful activities in Sitka, is an active community member and generous volunteer.

TIDES
are the rising & falling of ocean levels, caused by the sun & moon's gravitational pull combined with the earth's rotation.

SITKA SOUP KID'S PAGE

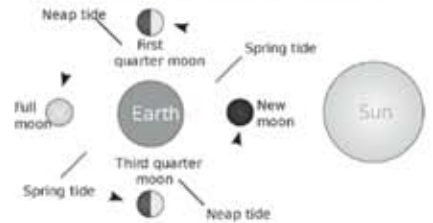

presents

Tides

TIDE FACTS

Magic Island is a "high tide island" - an island only during high tide, and only accessible by foot during low tide.

- The tidal cycle is of 24 hours and 50 minutes.

- Tidal power is the most predictable of all the renewable energy sources.

How can we get power from tides?
Tidal energy generators are very similar to wind turbines except they are below the water surface. The turbine and generator converts the movement of water coming from the change in tide into electricity!

- The moon is the most relevant factor in the creation of tides. The sun's gravitational force on the Earth is only 46 percent of the moon's.

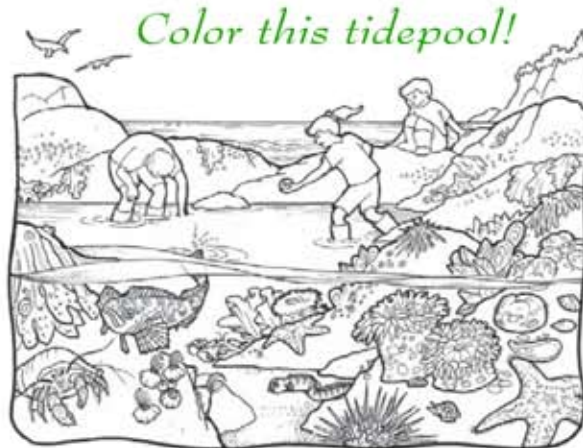

- Some regions of the world have a larger tidal range (the difference between the low and the high tide) than others because of the differences in the shape of the ocean floor.

- Many Sitka businesses provide free tide books, because knowing the tides is important in Southeast Alaska. Navigating waters like Sergius Narrows MUST be done at high water slack tide in order to have safe passage.

2% DIY FSBO

Baranof Realty has been a part of this community for over 30 years and we have a long history of giving back. We've seen good times as well as bad. Right now, we see that times are a little tough. Although we live in one of the most beautiful and abundant places in all the world, some economic headwinds are keeping our community from reaching its full potential. In the long run, these headwinds will give way to a brighter and more prosperous future. In the meantime however, we need to pull together and help our neighbors. To do our part, Baranof Realty is offering a 2% real estate fee to help those sellers who don't mind doing a little of the work themselves. We can't offer our full complement of services at this rate, but we can do our part to better support our friends. Call for a free consultation and let us apply our experience to your benefit. The true art of the deal is not what you can't do, but rather what you are willing to do.
